Sub: Air pollution in Maihar district – reg.

Ref. : Your letter Reference No. Nil, Dated Nil.

This is with reference to your above referred letter regarding air pollution level reaching to alarming situation in Maihar. The AQI is claimed to have touched a value of 400. No document has, however, been provided in this support from your end.

This office appreciates your concern shown towards environment and for the betterment of air quality. It is pertinent to mention that the MPPCB performs ambient air quality monitoring in Maihar on real-time basis and the analysis of data during the year 2024 reveal the AQI level to be in 'Good' or 'Satisfactory' category most of the time. The monitoring station at Maihar has shown 99% days under 'Good Days' category. The annual analysis of data of Maihar monitoring station shows that the air quality has never reached to Poor or severe category at any point of time. A summary of annual air quality data of Maihar station is appended herewith for ready reference. The air quality data on real-time basis can be viewed at link <https://erc.mp.gov.in/EnvAlert/AQI> or on EnvAlert App.

Hope this response is up to your satisfaction. We would appreciate if you can provide us any reference or the documents showing the air quality of Maihar region to help us take up the matter for further examination and analysis.
