Sub : Unsatisfactory Ambient Air Quality Index at Industrial locations.

Ref. : H.O. letter no. 27/HOPCB/Bhopal, dated 28.02.2018.

Your attention is drawn to the aforesaid reference vide which it was urged to ensure that CAAQMS installed by industries under your jurisdiction operate smoothly and AQI of the area does not go beyond the satisfactory level. It has, however, been observed that there is not much improvement in the status and still a strategy needs to be planned to minimize the instances of AQI exceedance. It is imperative to work out the causes of sustained AQI exceedance and take corrective measures accordingly to avoid repetition of violation of prescribed norms. Strictly adopt a zero tolerance approach under your jurisdiction for any infractions.

The AQI of individual industry is available on the website also and can be viewed at URL <http://www.erc.mp.gov.in/ESC/AirQualityIndex.aspx>. A copy of the referred letter is attached herewith for ready reference.

Yours Faithfully,

(A.A. Mishra)

Sub: Unsatisfactory Ambient Air Quality Index at Industrial locations.

The industries have installed continuous ambient air quality monitoring system (CAAQMS) for self monitoring of compliance and to ensure that the ambient air quality of the area meets the prescribed norms. The connectivity of CAAQMS with MPPCB facilitates to keep a watch on real-time air quality scenario.

On examining the monitoring results the following observations have been made :

1. Air quality index (AQI) at some locations is reaching to severe level.
2. Frequency of monitoring data received at ESC, MPPCB is not as per requirement. It is much less than the desired 85% uptime value.
3. Real-time monitoring data received at ESC is insufficient to draw any conclusion.
4. In some instances no data is received from industry throughout the month.
5. Data is transmitted to the ESC even if the instrument is not in operation.
6. Sometimes a peculiar trend is also noticed giving impression like data is programmed or fabricated.
7. Unexpectedly low values of parameters.

The above stated observations defeat the basic purpose of constant vigil and fail to maintain the sanctity of the environment. Please look into all the aspects and ensure that the ambient air quality of the area does not go beyond the satisfactory level. Manual monitoring and physical check can also be done to verify the real-time monitoring data.

The AQI of individual industry is available on the website also and can be viewed at URL <http://www.erc.mp.gov.in/ESC/AirQualityIndex.aspx>. Please refer the URL and check the real-time data regularly using credentials available with your office and ensure that the industries do not flout the norms. Strictly adopt a zero tolerance approach under your jurisdiction for any infractions.

Yours Faithfully,
