The Occupier of the Industry

(As per the Enclosed List)

Sub : Review Meet on 28/05/2018 on Compliance of Real-time Monitoring Systems.

A mechanism of self-monitoring of compliance has been initiated in Madhya Pradesh State following which 17 categories of highly polluting industries have installed real-time monitoring systems (RTMS) as part of compliance of directions. All the target industries were requested to ensure an uninterrupted operation of RTMS with >85% uptime frequency of data. The quality and reliability of data is a pre-requisite.

In this context, it is reiterated that for reliable data, a regular calibration is very essential. It is hoped that all the industries are regularl calibrating the RTMS and complying with the desired protocol to meet the basic objective of online real-time monitoring. In order to review the current status of RTMS, a meeting of concerned industries is convened at HQ, M.P. Pollution Control Board to focus on following points :

1. Availability of Calibration facility at the industry end.
2. periodic calibration of instrument & automatic entry of calibration data into the system through the software installed at industry end.
3. Availability of Remote calibration facility at each gaseous OCEMS.

The above stated points are to be complied in all respect. The industries that are not complying the above stated norms are directed to ensure compliance strictly by 31.05.2018 failing to that may attract punitive action against the industry.

It is requested to depute your responsible person during the meeting as scheduled below :

Date & Time - Monday, 28.05.2018 / 11 am
